DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The architectural style of the Warkentin House can be classified as Victorian Baroque. It can also be called a mansion because of its large size, complicated plan and stylistic pretensions. On the other hand, the exterior treatment is quite restrained in comparison with other Victorian Baroque mansions of the period. This is presumably due to the self abasing nature of its Mennonite owner. The spindle work railings of the porch and the mildly decorated cornices, gable ends and chimneys are the only ornamentation on an otherwise relatively plain clapboard and shingle house.

Interestingly enough, the interior gives quite another impression; one of great variety and luxury. The Baroque desire for richness and heaviness is best seen here. Each room is decorated in the finest materials of the time. Flocked wall paper, inlaid floors, carved woodwork and leaded glass all in great variety are seen. Each room is done in different materials and furnished in a different motif. It is the furniture and appointments which are quite impressive. The major portion of the original furnishings and appointments are in the home and most rooms have complete integrated sets. Cabinets are filled with fine crystal, silver and linens. Even such things as small watches of the period are found in drawers and the book case is full of books.

The property on which the house stands has several large elm trees, oak trees, maple, linden, and interesting walkways through the garden. A curved red brick drive connects the street with a porte-cochere at the house and continues in a graceful curve to a carriage house at the rear of the lot. The carriage house is in the same restrained style of the house. It contains such interesting things as a turntable on which an early electric car was parked and turned around. In the rear yard stands an octagonal gazebo with walls of decorative lath work, characteristic of the times. Though some of the original property was sold, the house and grounds still enjoy a separation and separate identity from their more recent neighbors.

All in all the Warkentin House and grounds is a complete and integrated example of the way of life for which it was built. One of very few still remaining in anything like their original form and condition. 1

## STATEMENT OF SIGNIFICANCE

The property known as Warkentin House is significant in the areas of architecture and history.

Architecturally - see preceding page.

### Historically

Bernhard Warkentin purchased the property 211-East 1st St. in 1886 and began his home which remained the family home until the death of his widow in 1932, when it was deeded to Bethel Deaconess Hospital and used as the Bethel Deaconess Sisters Home until the past year when it was offered for sale to a Preservation organization. Upon completion of purchase, Preservation of Kansas Landmarks (Inc. filed) plans to open the home for tours and meetings, to bring the people closer to this part of their heritage. The wheat story has never been told and we feel this to be the last real opportunity to help people become aware of this part of our history and its effect on the National economy. In the library of the home a Research Library on Warkentin, the Hard Winter Wheat and Mark Carleton<sup>2</sup> is planned. We have access to the personal letters of Warkentin, his correspondence with Carleton regarding their work, etc.

"Bernhard Warkentin is a famous name in the wheat annals of the nation. It was he who led the great Mennonite migration into Kansas during the early 1870's, and the Mennonites brought Turkey Red seed wheat with them from southern Russia. After the superiority of this variety was established, he imported large quantities of seed for distribution in the area where his flour mills were located. Turkey Red became one of the foremost factors in the creation of the hard winter empire of the Southwest."<sup>3</sup>

Mark Carleton, the celebrated cerealist with the U.S. Department of Agriculture, worked in Kansas with Warkentin to find the right variety of hard wheat for Kansas, and eventually the entire U.S.

"The chain of events that in the course of time established hard winter as the most extensive class of wheat in the United States began when Bernhard Warkentin set his feet on Kansas soil and urged his fellow Mennonites to follow.

The career of Bernhard Warkentin serves to exemplify a statement once made by Thomas Jefferson. Said the Sage of Monticello, "The greatest service which can be rendered to any country is to add a useful plant to its culture, especially a bread grain."<sup>3</sup>
